Social Networks and Learning

Doctoral Seminar • June 21-25, 2010

Hosted by Athabasca University

10707 - 100 Avenue (University of Lethbridge - Edmonton Campus)

This five-day seminar is geared toward faculty and doctoral students interested in networks and learning. It will be a multidisciplinary gathering of educators, information, media and computer science researchers.

Topics will include:
- Characteristics and attributes of learning in social networks
- Advanced technologies for network formation: augmented reality, place-based social networks, data overlays on physical objects
- Networked pedagogical models
- Adaptivity and personalization in learning
- Mobile learning
- Openness in education
- Research gaps and needs in social networked learning
- Research methodologies and agendas
